

Infrastructure for Smart Kenya

Orange Telkom Kenya

orange™

Our Mission

- Best broadband provider in Kenya,
- The best choice for employees and customers, through values, systems and processes which deliver superior quality of service

Our Vision

- To be the global multimedia operator in East Africa

Countrywide footprint

We have a country-wide presence in 6 major regions:

- Nairobi
- Coast
- Central
- Central Rift Valley
- North Rift Valley
- Western

History and Capacity

- Established in 1999 as Kenya's premier telecommunications provider
- Telkom Kenya provides integrated telecommunications solutions with a wide and growing range of voice and data services as well as network facilities.
- Telkom Kenya has shareholding in both the East African Marine System (TEAMs) and the Eastern Africa Submarine System (EaSSy) and has more than 4,400 terrestrial fibre infrastructure that run across the country.

- The company therefore has the largest footprint within Kenya and has further interconnected to the wider Eastern Africa region thus enabling more people to connect, create and achieve.
- Moreover, the commissioning of France Telecom's Lower Indian Ocean Network II (LION II) has bolstered the company's infrastructure capacity.

Business Portfolio

- The company also has a broad business portfolio offered under the brand name Orange Business Services
- The company continues to be a major provider within the country and region for wholesale traffic i.e. carrier to carrier, enabled by its vast fibre optic infrastructure.
- The company also provides products and solutions, meeting the expectations of the mass market customer.
